Do you feel like your skin need some attention or serious TLC?! If so the 90-Day Skin Challenge is for you. When you want to look your absolute best planning is key. And starting the challenge now is perfect timing before the holidays!

The purpose of this challenge is to stimulate your skin and inspire you to jump start a skincare regimen that will repair, remodel, and restore your skin's health and beauty in a short period of time.

To get long term anti-aging, beautiful skin it's important to be aware of and take care of your skin by keeping it healthy from the inside-out without causing inflammation or damage (from environment, lifestyle, aggressive products or treatments).

The 90 day challenge involve using Osmosis Skincare's natural corrective home care regimen plus a series of professional non-chemical Facial Infusion Peel treatments that will give you healthy, glowing skin even faster.

The Osmosis Facial Infusion Peel reach beyond the skin's surface and give amazing results and right now it is the number one non-chemical peel on the market. It is completely safe for all skin types with NO sun sensitivity associated to it and it is totally customizable in strength so it can address all skin conditions.

The Facial Infusion Peel is formulated with a stabilized liposomal delivered form of retinaldehyde (a natural form of Vitamin A derived from beta carotene) that is converted and will boost the immune system and provide healthy skin cells. It is designed to infuse and thicken the dermis and is equivalent in strength to prescription Retina but less irritating and non-inflammatory. So this non chemical peel avoids damaging the epidermis (e.g. redness and sensitivity) by penetrating several high-dose active ingredients into the dermis through the liposomal delivery.

What is included in the 90 Day Skin Challenge?

- 1 Osmosis Med Spa Facial
- 3 Osmosis Facial Infusion treatments
- Osmosis Home Care products, tailored for your skin for best results

The 90 Day Challenge will help with:

- Signs of aging
- Acne
- Rosacea
- Hyperpigmentation
- Eczema
- Psoriasis
- Enlarged pores
- Scarring
- Capillaries

I will work with you for 90 days to improve your skin and address any issues or concerns you may have. You will have four professional treatments and then a homecare regimen. The treatments and products are tailored to your specific needs.

Guidelines:

The 90 Day Challenge only works if you come in for your facials and use your homecare products the way it's prescribe. The program requires that you sign to not use any other skin care products during this time period. Using any other skin care products other than those prescribed will alter your results, making the challenge less effective.

At your first appointment, you will have a chance to discuss all your skin care concerns, have a full skin analysis, and receive an Osmosis facial. You will go home with full size appropriate daily skin care products, and a "prescription" with how to use them. Your next three treatments will be Osmosis Facial Infusions, done every three to four weeks. You will be amazed at the difference 90 days can make. And, with the Osmosis guaranteed results, what do you have to lose?

Achieving beautiful skin requires a comprehensive skin treatment plan. I want to help you in your transformation to healthier, more radiant skin. Are you up for the challenge?

Pricing varies according to skin types and concerns.

Pre-paid packages are available for great savings!

PS: During this challenge, I recommend to take before and after pictures to capture the skin transformation.

"I couldn't be more excited to tell you that the trend towards non-inflammatory skincare is picking up steam. Throughout social media and trade shows, it is clear that skincare is shifting to more intuitive and supportive treatments. Devices like micro-current and LED are becoming the preferred option over lasers. Even those who promote peels and acids are telling Osmosis story of treating the skin from the inside-out. "

– Dr. Ben Johnson, Founder of Osmosis Skincare
